Profile

I make websites with optimal performance and high SEO, accessibility, and readability.

Skills

Professional Experience

Geliver

Frontend Development Intern

2021
Manisa

Coded user interfaces that display and handle incoming and ongoing dynamic data of delivery details.

RMOS Yazılım

Full Stack Development Intern

2024
Antalya

Developed an OCR system that reads passport / identity card images and extracts their information for customer management.

Designed and developed an admin panel UI that includes personnel management and the OCR system to handle incoming images.

Pella Global Marketing

Full Stack Developer

06/2024 -
present
Antalya

Delivering and sustaining high performance and search engine optimized websites for our partners with inclusive frontend & backend tech stacks.

Organizations

IEEE MCBU Computer Organization

Frontend Developer

2021

Manisa

Developed a mobile app for school services (notifications, announcements, student information, weekly / monthly meals, etc.). As a frontend developer, I participated in engineering and coding user interfaces for dynamic data.

Certificates

- Responsive Web Design 

- Front End Development Libraries 

Education

Computer Engineering – Bachelor's Degree

Manisa Celal Bayar University

2019 – 2024

Manisa

Projects

Ticktasks

2023 – present

Previously titled "Multiple Timer", this is a versatile productivity tool as a merge of to-do apps and Pomodoro timers. Users can create plans which has described steps which may or may not have a duration. It is under maintenance to add improvements and features such as public / private plans and bookmarking others' plans.

Exammeter

09/2023 –
01/2024

Developed an online exam platform which assesses the exam questions' difficulty and discrimination for future exams to be healthier and more sustainable.

TicketEase

01/2024 –
06/2024

Using the existing ticket entries, we developed a fine-tuned chatbot which precisely responds to tickets opened by customers.
